

ESE_December
2020_Computer_Operating System and
System Software_2UCE502_V_
29/12/2020_2.30-3.00 p.m._ Objective
Questions (20 Marks)

* Required

1. Email address *

2. Enter your Name *

3. Enter your Roll No. *

4. Enter your Divison *

Mark only one oval.

☐ A

☐ B

Questions

5. Which is not a UNIX system call for file manipulation?

1 point

Mark only one oval.

- ☐ Open()
- ☐ Read()
- ☐ Write()
- ☐ Wait()

6. Which is not true about the layered OS structure?

1 point

Mark only one oval.

- ☐ A layer consist of data structure and a set routines that can be invoked by higher level layers.
- ☐ A layer uses functions and services of the below layers without knowing its implementation
- ☐ It has simplicity of constructions and debugging.
- ☐ It is very efficient because of using so many system calls.

7. What is the type of UNIX OS structure?

1 point

Mark only one oval.

- ☐ Simple Structure
- ☐ Layered Structure
- ☐ Hybrid
- ☐ Modular

8. Which of the following statements is/are true? 1. A process is a program that performs a single thread of execution. 2. Process migrates among various scheduling queues through its lifetime. 1 point

Mark only one oval.

- ☐ Only 1
- ☐ Only 2
- ☐ Both 1 and 2
- ☐ Both are not true

9. What are the contents of PCB? 1 point

Mark only one oval.

- ☐ Process state, program counter, registers
- ☐ Process state, stack, registers
- ☐ Program counter, stack, registers
- ☐ Program segment, registers, data

10. Each thread get its own_____. 1 point

Mark only one oval.

- ☐ Program counter
- ☐ Memory
- ☐ Files
- ☐ Memory and files both

11. If scheduler is taking 10ms to decide to execute for 100ms then how much of CPU is wasted? 1 point

Mark only one oval.

- ☐ 9%
- ☐ 10%
- ☐ 11%
- ☐ 1%

12. Medium-term scheduler is required to 1 point

Mark only one oval.

- ☐ To increase degree of multiple programming
- ☐ To decrease degree of multiple programming
- ☐ To reduce context switching time
- ☐ To decrease throughput of the system

13. Under what circumstances, a Parent may terminate the execution of children processes using the abort() system call? 1 point

Mark only one oval.

- ☐ when a Child has requested some resources
- ☐ when a Child has requested more resources while holding some of the resources
- ☐ when a Child calling another child process
- ☐ Either when Child has exceeded allocated resources or Parent is exiting

14. If parent of a process terminated without invoking wait() system call , then 1 point
the process is called_____.

Mark only one oval.

- ☐ An Orphan
- ☐ Zombie
- ☐ Thread
- ☐ Child Process

15. Ready Queue may not be ordered as 1 point

Mark only one oval.

- ☐ Queue
- ☐ Stack
- ☐ Heap
- ☐ Linked List

16. Which of the following is not a CPU scheduling Criteria? 1 point

Mark only one oval.

- ☐ CPU Utilization
- ☐ Resource Utilization
- ☐ Throughput of the system
- ☐ Turnaround time

17. In a Multiprocessor system, if SMP need to keep all CPUs loaded for efficiency. What may be the drawback? 1 point

Mark only one oval.

- ☐ Workload distributed evenly.
- ☐ Load balancing approaches will be used.
- ☐ It may counter attack processor affinity.
- ☐ Common Ready queue

18. Consider the given disk queue with request for input/output to block on cylinders 64, 123, 68, 99, 183, 32, 14. Assume that disk head is at cylinder 53 and moving towards cylinder number 0. The total number of head movements using LOOK algorithm is: 1 point

Mark only one oval.

- ☐ 236 cylinders
- ☐ 208 cylinders
- ☐ 252 cylinders
- ☐ 640 cylinders

19. Which of the following is true while preventing “Hold and Wait “ condition during Deadlock Prevention? 1 point

Mark only one oval.

- ☐ Low resource utilization only
- ☐ Starvation only
- ☐ Both Low resource utilization and Starvation
- ☐ Neither Low resource utilization nor Starvation

20. Which of the following is special atomic hardware instruction for the hardware synchronization in multiprocessor environment? 1 point

Mark only one oval.

- ☐ Wait and Signal functions using Semaphore
- ☐ Monitors
- ☐ Test memory word and set value
- ☐ Message passing

21. Which of the following is a correct statement? 1 point

Mark only one oval.

- ☐ The time taken to move the disk arm to the desired cylinder is called the seek time
- ☐ The time taken to move the disk arm to the desired cylinder is called the rotational latency
- ☐ The time taken to rotate to the disk head for the desired sector is called the Seek time.
- ☐ The time taken to rotate to the disk head for the desired sector is called the transfer rate.

22. The statement that reserves memory and associates names with them. 1 point

Mark only one oval.

- ☐ DS
- ☐ EQU
- ☐ MOV
- ☐ USING

23. Which of the following is not an Assembler directive statement?

1 point

Mark only one oval.

- ☐ START
- ☐ EQU
- ☐ DC
- ☐ USING

24. Which of the following is not an entry of FRT ?

1 point

Mark only one oval.

- ☐ Address of instruction whose operand field contains the forward reference
- ☐ Symbol to which forward reference is made
- ☐ Entry of segment Register
- ☐ Number of the SRTAB to be used for assembling the reference.
